About

Hi, I'm Ruhlan Rzayev, a passionate Frontend Developer with a strong foundation in HTML, CSS, and JavaScript. Currently studying Information Technology at Azerbaijan University, I focus on creating user-friendly and visually appealing websites. I'm always eager to learn new technologies and improve my skills through personal projects and coding challenges. I value teamwork, adaptability, and continuous self improvement. I aim to create high-quality, functional websites while staying updated with industry trends.

Work Experience

FRONTEND DEVELOPER AT INTERN INTELLIGENCE

January 2025 - February 2025

During my internship at Intern Intelligence, I worked on real-world projects, including a personal portfolio website and a login page. I gained hands-on experience in front-end development using HTML, CSS (SCSS), JavaScript and BaaS improving my problem-solving and UI/UX design skills. Collaborating with a team helped me adapt to a professional work environment and write clean, efficient code. Projects I developed at Intern Intelligence:

- [Personal Portfolio Website](#) - A fully responsive portfolio website showcasing skills and projects.
- [Login / Register Page](#) - A secure and user-friendly authentication interface with a modern UI design.

Education

AZERBAIJAN UNIVERSITY (2022-2026)

B.Tech Information Technology

DIV ACADEMY (2024-2025)

Full Stack Developer

Certificates

Projects

MEDICAL WEBSITE

This project is a fully responsive medical website template created using Bootstrap. It is designed with a clean and modern UI, focused on providing a professional and accessible experience for medical-related businesses. The website includes various sections such as services, team, testimonials, and contact, making it suitable for hospitals, clinics, or medical professionals. The responsive design ensures it works seamlessly across all devices.

RESTAURANT WEBSITE

A restaurant website built with HTML, CSS, and JavaScript. This project showcases my ability to create an interactive and user-friendly website, including a menu section, reservation form, and gallery. The website is designed with a focus on visual appeal and functionality, offering an intuitive experience for users looking to explore the restaurant's offerings. JavaScript is used to enhance interactivity, such as a working reservation form.
